

2012 Youth Wood Bat Program

Sandlot Stiks recognizes the need for a quality wood bat at the youth level and is a leading supplier of MLB spec Ink Dot tested High Density professional grade Hard Maple and White Ash solid wood bats to Youth Wood Bat Leagues. We realize Youth baseball is much more demanding and competitive than ever before and for that reason have developed a line of wood bats specific to those demands. Our newly redesigned Sandlot Stiks line of Youth wood bats are unique to our company and have been optimally designed for quality and geared to fit the needs of modern youth wood bat players. For this line of bats weight, balance, durability and ease of use were all taken into consideration with the modern youth player in mind.

2012 Premier Youth Wood Bat Program -

The Sandlot Stiks line of Youth wood bats are unique to our company and have been optimally designed for quality and geared to fit the needs of modern youth wood bat organizations and players.

The following youth models are offered through this program without personalization available in ½ and full dip Clear, Chocolate, Caramel and Black only.

Junior (J) Series-

141J – The 141J was designed after the very popular pro model 141. It features a .9375” handle with a fairly obvious transition into its long barrel. The 141J is a durable design utilizing the upper mid range in wood density for modern youth wood game bats. This particular bat is suited towards the more powerful hitters and is designed for use in leagues where barrel diameters are restricted to 2.25”. This bat is the first of two designs in our Junior (J) Series and is available in a weight range between -5 and -7 and lengths between 28-31”

271J – The Model 271J is taken from the pro model C271, most widely recognized wood bat model today. We redesigned the model to fit the needs of any type of youth hitter. This design features a comfortable tapered knob with a .925” diameter handle and long slow taper into an end loaded barrel. This model utilizes the upper density range of timber for our Youth line and like the 141J is designed for use in league where the barrel diameters are restricted to 2.25”. This bat is the second of the two designs in our Junior (J) Series and is available in a weight range between -5 and -7 and lengths between 28-31”

Tournament (T) Series-

141T – The 141T is the tournament barrel version of our 141J. It features a conventional knob with a .9375” handle and a fairly obvious transition into its long larger diameter 2.42” barrel. The 141T is a durable design utilizing the upper mid density range of timber for our Tournament Youth line. This particular bat is suited towards the more powerful hitters and is designed for use in leagues where barrel diameters are **not restricted** to 2.25”. This bat is the first of two designs in our Tournament (T) Series and is available in a weight range between -5 and -7 and lengths between 28-31”

271T – The Model 271T is the tournament barrel version of our 271J. This design features a comfortable tapered knob with a .925” diameter handle and long slow taper into an end loaded barrel. This model utilizes the upper density range of timber for our Tournament Youth line and like the 141T is designed for use in league where the barrel diameters are **not restricted** to 2.25”. This bat is the second of the two designs in our Tournament (T) Series and is available in a weight range between -5 and -7 and lengths between 28-31”
